Dear Scott

### International Portability Matrix

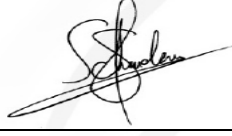

As you may be aware, REPS Polska has been approved as an associate ICREPs member. REPS Polska has mapped their standards to the global ICREPs standards in their entirety, which have now been given approval by EOSE on behalf of ICREPs. Please see the table below regarding the categories of registration for REPS Polska members to gain professional membership.

REPs Polska Standards has been appointed and approved by EOSE on behalf of ICREPs to accredit all qualifications on the REPs Polska framework, we provide certification for each learner who has successfully passed their assessment.

Ben Gittus from EOSE on behalf of ICREPs has also provided confirmed their full support for the portability of REPS Polska members to other ICREPs registers where portability is accepted.

Our next step is to now complete the portability matrix for each ICREPs member country.

For your convenience we have created a table below highlighting the REPS Polska categories and those that may match your country's categories. Through this process REPs Polska will be able to provide International Portability to its members.
